In this enjoyable book Fuller (formerly, Univ. of Hawai'i) explores and answers 150 geographical trivia questions. However, instead of listing the questions and providing the corresponding answers, which would make for a very boring read, he spins his responses into geographical explorations of various topics: climate and weather, maps, islands, rivers, parks, sports, and more. In 46 chapters addressing the questions and associated topics, Fuller does a wonderful job of providing historical context for his answers, in a way that is both entertaining and engaging. So why would Fuller write such a book? For one thing, he was a winning contestant on the television program Jeopardy! and chaired a championship College Bowl team. Trivia is clearly in his blood. In addition, he has a PhD in geography and has taught at universities for 35 years. Being named "Teacher of the Year" by the National Association for Geographic Education probably explains how he does such a great job of telling stories, while increasing one's knowledge of geography as a whole. Summing Up: Recommended. General readers.
